Practical neodymium magnets with plastic housing and a diameter of 14 mm in various colours. These versatile office magnets are ideal for use on whiteboards and magnetic boards. The magnets are easy to grip, easy to remove and have been manufactured without glue.

PRODUCT NOTES:

- " strong holding power with a small surface area
- " made without adhesive
- " easy to grip, easy to remove

As an alternative to the standard, we also offer customised solutions:

" plastic housing in special colours

" higher adhesive force

* The forces have been determined at room temperature on a glass board with 4mm glass thickness (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded.

* The forces have been determined at room temperature on a polished plate made of steel (S235JR according to DIN 10 025) with a thickness of 10 mm (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded. The type of application (installation situation, temperatures, counter anchors, etc.) sometimes influence the forces enormously. The values given are for orientation purposes. Let our experts advise you.
