BRUGGER MAGNETSYSTEME

PRODUCT DATA SHEET

Rubberised magnet systems

NdFeB magnetic system, white rubber casing, supplied as a complete system with a hook or eyelet, rectangular

PRODUCT INFORMATION:

Strong, robust, flexible: neodymium magnet systems from BRUGGER

Our **rectangular magnet systems** are the first choice for demanding applications. The combination of **powerful neodymium magnets** and a protective white rubber coating guarantees maximum holding force whilst providing protection against corrosion and surface scratches. Thanks to a range of hook and eyelet options, the system is ready for immediate use in industry, exhibition stand construction, shopfitting or the trades.

As an alternative to the standard range, we also offer bespoke solutions:

» Other colours for the rubber coating

» Harder or softer rubber coating

* The forces have been determined at room temperature on a polished plate made of steel (S235JR according to DIN 10 025) with a thickness of 10 mm (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded. The type of application (installation situation, temperatures, counter anchors, etc.) sometimes influence the forces enormously. The values given are for orientation purposes. Let our experts advise you.
