#### PRODUCT DESCRIPTION:

The **magnofy** gel pad - makes (almost) any surface magnetically usable

**magnofy** is a round, flat gel pad that turns smooth surfaces into a **magnetic docking surface** in no time at all - no drilling, no tools, no stress.

Simply attach, dock accessories (e.g. magnet with hook or eyelet or thread) and securely attach objects.

If you want to rearrange: remove, reposition, done.

How it works

magnofy combines two functions in one pad:

- **Nano-gel adhesive layer** on the underside: provides a strong grip on many smooth surfaces (e.g. tiles, glass, metal, painted surfaces).
- **Magnetically usable surface** on top: magnets and magnetic systems with clever attachments adhere to it - turning the surface into a flexible attachment zone.

Mounted in seconds - completely tool-free

- Briefly clean the surface
- Remove the protective film and press on magnofy
- Attach the magnet

## Your advantages with magnofy

- **Can be removed without leaving any residue**  
Can be removed cleanly when used correctly - ideal for rented flats, kitchens and bathrooms.
- **No drilling / no tools required**  
No holes, no dust, no noise: mount instead of having to mount.
- **Reusable**  
When the adhesive strength wears off: **rinse with water, allow to dry** and reuse.
- **Extra strong adhesion**  
Developed for reliable everyday holders - and with the right attachments also for more demanding applications.
- **Non-slip on smooth surfaces**  
The gel grip ensures a secure fit, especially where nothing else can be attached.
- **Safe choice of materials**  
Free from BPA, phthalates, PVC and plasticisers (if these are your tested specifications - be sure to state this on the page).
- **Non-rusting - even in damp conditions**  
Suitable for areas with moisture/humidity (e.g. bathroom, kitchen, vanlife).
- **Made in Germany**  
Developed and produced in Germany - short distances, high standards.

## Typical applications

- **Bathroom:** towel, shower squeegee, organiser
- **Kitchen:** hook rails, towel holder, spice/tool holder
- **Office:** cable management, headphones, note/clip solutions
- **Workshop/vanlife:** tools, lamps, organisers, shelves, bars

This flat gel pad is the next generation of attachment! It makes almost any surface magnetically usable - without drilling, residue-free, reusable.

Thanks to innovative nano-gel technology, these pads provide a strong hold on smooth (load-bearing) surfaces. Simply clean with water, leave to dry and reattach - it's that easy!

---

Best results are achieved on **clean, dry, smooth** surfaces. Load capacity and holder may vary depending on the surface, load direction (pulling vs. levering off) and accessories - if in doubt, test briefly in an inconspicuous place.

\* The forces have been determined at room temperature on a polished plate made of steel (S235JR according to DIN 10 025) with a thickness of 10 mm (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded. The type of application

(installation situation, temperatures, counter anchors, etc.) sometimes influence the forces enormously. The values given are for orientation purposes.
