DSP23-Ndni	23	7.5	130	20	10 Stück
DSP29-Ndni	29	8	160	32	10 Stück

Our extra strong office magnets with metal housing are round, nickel-plated and contain a magnet made of NdFeB. They offer impressive adhesive force for walls that have been treated with magnetic paint or magnetic plaster. Another advantage of our magnets is their ability to bridge air gaps. This means that they can maintain a strong adhesive force even in situations where there is a small gap between the magnet and the surface.

PRODUCT NOTE:

- " Beware of very strong adhesive forces when placed directly on metal
- " Particularly suitable for walls with magnetic paint or magnetic plaster
- " Very good air gap bridging

As an alternative to the standard version, we also offer customised solutions:

- " Painting in other colours possible

* The forces have been determined at room temperature on a polished plate made of steel (S235JR according to DIN 10 025) with a thickness of 10 mm (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded. The type of application (installation situation, temperatures, counter anchors, etc.) sometimes influence the forces enormously. The values given are for orientation purposes. Let our experts advise you.
