# Fastening solutions are our expertise.

**Example of magnetic furniture fittings**

The designs of this product family are just as versatile as the installation situations for magnetic fittings. From round to square, made of plastic or metal, with a front or side holding surface, damped or rigid, for screwing on or clipping in. Our small powerhouses offer practical solutions, whether for kitchen cabinets, living room cabinets or other pieces of furniture.

Magnetic fittings with a rubberized adhesive surface impress with their pleasant feel and muffled closing noise. They also prevent scratches or damage to the counterpart.

## **Furniture magnets as an ideal helper in furniture construction:**

The use of magnetic systems for furniture offers many practical advantages, including improving the design and user-friendliness of furniture.

Examples of use:

- For holding doors, flaps and lids such as cupboard doors and drawers
- As a flexible door stop
- Fixing paneling
- Holding utensils on walls

## **Discover the wide range of magnetic applications that we can offer for furniture construction:**

### **Door magnets**

These little powerhouses make a good magnet for interior doors or balcony or patio doors. Thanks to their robust design, they can be used as door stoppers or door closers and adhere to the ferromagnetic counterpart, for example the door handle. One practical advantage of door magnets, for example, is that doors can no longer slam shut accidentally.

### **Door locking systems**

The magnets are not only used as magnetic locks for doors in the home. The magnets can also be used for installation in camping vans, for example. They can be installed invisibly and not only provide security, but also an attractive appearance. This finally puts an end to bulky and unsightly drawer locks or door locks. Thanks to the strong super magnets, doors and cupboards remain locked while you are driving in your camper.

### **Magnets for cupboard doors**

Magnets for cupboard doors are not only suitable for a minimalist interior design. Depending on the room, furniture magnets can be space-saving. With the help of magnets, there is no risk of getting stuck on handles or knobs.

Flush installation in a piece of furniture

Slotted holes allow subsequent adjustment of the fitting

Door retainer

Swing door

Magnetic stone for aluminum profiles - or custom-made grooves

Attaching wooden cladding to a metallic substrate

## Very different furniture fittings are used in furniture construction.

If you want to close doors, drawers and flaps but don't want to lock them, magnetic fittings with a counter plate are the perfect solution. Our screw-on magnetic fittings are really robust thanks to the sturdy powder-coated metal housing. They can be used discreetly in many places thanks to their flush installation. Thanks to the rubberized holding surface, the latch is soft to the touch and reduces closing noise.

Our standard systems are available in different versions. For example, the rubberized holding surface is located at the front or optionally at the side. This allows you to decide which version you need depending on the installation situation.
